EDUCATION

2021 - 2025

Technological Institute of the Philippines - BS in Information Technology

Relevant Coursework: Software Engineering, Database Systems, Artificial Intelligence.

WORK EXPERIENCE

Mar 2025 - Aug 2025

Software Developer Intern - Internal API & Company Website

ARC Alphotics Inc.

- **Designed and implemented a REST API-based automation system** to ingest third-party inquiries into a centralized data pipeline, reducing manual data entry by approximately 82 percent.
- **Developed RESTful CRUD APIs** with input validation and automated reporting features, improving data accuracy and reliability across 3,000+ client records.
- **Managed and maintained the company website using Wix**, monitoring traffic and user behavior with Google Analytics while supporting marketing performance tracking through Google Ads campaigns.

PROJECTS

Full Stack Developer – ChurchEngine (Freelance)

Feb 2026 - Mar 2026

<https://churchengine.onrender.com/>

- **Developed ChurchEngine, a Supabase-powered knowledge portal** managing 100+ topics on doctrine, ministry guidance, and church operations, featuring role-based authentication, admin approval workflows, and full CRUD content management.
- **Centralized 200+ resources for hundreds of Christian users**, reducing repetitive content questions by ~35% and ensuring consistent, reliable guidance across the platform.
- **Built an admin dashboard** for controlled publishing, user management, and topic updates, cutting 4–6 hours of manual coordination per week and improving knowledge delivery at scale.

Full Stack Developer – Internal FAQ Management System (ARC-Engine)

Jan 2026 - Feb 2026

<https://arc-engine.onrender.com>

- **Built an internal knowledge management portal** with role-based authentication, admin approval workflows, and full CRUD content management to streamline operational documentation and agent support.
- **Reduced onboarding and support dependency** by centralizing 50+ FAQs and operational scripts, cutting repeated questions by an estimated 30–40% and eliminating manual document updates for supervisors.
- **Automated knowledge distribution** workflows across 20+ agents through a centralized internal portal, reducing manual supervisor updates and saving 3–5 hours per week in operational overhead.

Project Developer – FoodShare Connect

Jul 2024 - Jun 2025

- **Implemented expiry-based prioritization algorithms** for food donation matching, improving redistribution efficiency for near-expiry resources.
- **Developed analytics dashboards** to monitor donation flow, delivery completion, and platform performance metrics, enabling data-driven insights into redistribution efficiency and operational activity.
- **Designed relational database schemas** and REST API workflows to support scalable donation matching, data management, and system integration for platform deployment.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, HTML, CSS
- **Frameworks & Libraries:** FastAPI, Flask, React.js, Node.js
- **Backend & APIs:** REST APIs, Swagger/OpenAPI
- **Databases:** PostgreSQL, MySQL, Supabase
- **Tools:** GitHub, Uvicorn, Postman, Wix
- **Analytics:** Google Analytics, Google Ads
